

LYNSIE ARAGON

(512) 736-8054 | Lynsie.aragon@gmail.com | [LinkedIn](#) | [GitHub](#) | New York, NY

Summary: Former litigation paralegal transitioning into software engineering

SKILLS

React.js, Redux, JavaScript, Ruby on Rails, JSX, jQuery, SQL, PostgreSQL, MongoDB, Express, SQLite, Git, GitHub, HTML5, CSS3, Google Maps API, RSpec, Test driven development, Documentation

PROJECTS

Yapp | Full stack clone of Yelp

[Live Site](#) | [GitHub](#)

- Applied knowledge of Ruby on Rails, PostgreSQL, JavaScript, React, Redux, and testing to develop backend, frontend, and visuals resulting in a user's ability to search for and review restaurants with full CRUD capabilities
- Implemented Google Maps API to render all searches for accurate restaurant locations of all seed data
- Meticulously leveraged CSS throughout the app to recreate an accurate visual clone of Yelp

Trip it | MERN stack group application

[Live Site](#) | [GitHub](#)

- Collaborated with three other developers to create a travel application containing full CRUD capabilities that allow a user to plan and organize trips and events with other users
- Developed the frontend of the application utilizing React, Redux, JavaScript, and JSX to establish all application components that users interact with throughout the app
- Established and maintained git workflow with team by committing work in 30 minute increments, communicating with team when merge conflicts arose, and using clear commit messages to provide clarity of code

PinPoint Perfection | Interactive data visual

[Live Site](#) | [GitHub](#)

- Implemented a sorting algorithm that returns the best bowling ball a user should use on a fresh oil pattern after user inputs personal specs, personal bowling ball list, and an oil pattern the user is bowling on
- Created the full interface of the application with intuitive user experience in mind to create an easy-to-use app
- Learned how to better read and use documentation regularly to build a functional application

EXPERIENCE

Intellectual Property Litigation Paralegal

Fabricant LLP

Jan. 2021 – Apr. 2022

- Queried eDiscovery databases (SQL) two to three times per week to gather case documents and exhibits for hearing and trial preparations
- Drafted and proofread case documents and client correspondence daily to maintain professionalism and error free documentation
- Supported 12 attorneys through heavy caseloads by ensuring court document submission deadlines were met, managing e-file organization, and maintaining constant communication with the team

Securities Litigation Paralegal

Hach Rose Schirripa & Cheverie, LLP

Sept. 2019 – Jan. 2021

- Queried eDiscovery databases (SQL) weekly to retrieve case documents for hearing and trial preparations
- Provided both case and administrative support to two firm partners and four associate attorneys allowing for smoother firm operations
- Standardized the firm's naming convention and filing structure resulting in reduced case file lookup times from 15 minutes to under five minutes

EDUCATION

App Academy

Completion: Mar 2023

- Immersive software development program with focus on full stack web development

Prairie View A&M University

Graduated: May 2017

- Student-athlete: B.S in criminal justice / Bowling scholarship
